

# Juan Felipe Rodríguez Galindo

Software Engineer · Backend & Cloud (AWS) · AI-powered development

Bogotá, Colombia | juferoga@gmail.com | juferoga.pro | linkedin.com/in/juferoga | github.com/Juferoga

## Summary

---

Systems Engineer who builds products end to end in the financial sector, from scoping to production reliability. Solid experience in **scalable backend** (Java/Spring Boot, Python/Django, Node.js), microservices architecture, **infrastructure as code on AWS**, and modern frontend. I integrate **AI tools (Anthropic Claude, Prompt Flow)** as a genuine accelerator of my development workflow and my team's. Background in secure coding and applied cryptography. Former Director of the Universidad Distrital GNU/Linux Group. *"Changing the world one line at a time."*

## Experience

---

**Systems Analyst II · Cloud Developer**, Banco de Bogotá – Bogotá, Colombia Feb 2026 – present

- Lead the development of high-impact Cloud solutions for the automation of financial processes, owning features end to end from design to production.
- Embed AI tools (Anthropic Claude, Prompt Flow) into the development workflow as a genuine team accelerator, not a novelty.

**Systems Analyst III · Cloud Developer**, Banco de Bogotá – Bogotá, Colombia Oct 2024 – Mar 2026

- Evolution of critical digital platforms with IaC on **AWS**, microservices architecture, and modern frontend.
- Design of resilient, highly scalable backend solutions prioritizing **secure coding**, software quality, and production reliability in the financial sector.

**Full Stack Developer**, Instituto Geográfico Agustín Codazzi (IGAC) – Bogotá, Colombia Mar 2024 – Dec 2024

- Support and development of data-collection applications (CICA, Consultores Catastrales) with **Angular 16-18**, **Java/Spring Boot**, and Oracle DB.
- Deployment with GitLab CI/CD and Docker.

**Front-End Developer**, Agencia Catastral de Cundinamarca – Bogotá, Colombia Sept 2022 – Dec 2023

- Internal and public cadastral-procedure portals (full stack) with **Django**, **AngularJS**, and GitLab CI/CD.
- Full containerization, Jenkins, and Traefik. MINTIC compliance for government portals.

**Research Monitor**, Universidad Distrital · GICOGE Research Group – Bogotá, Colombia Sept 2023 – July 2024

- Research group infrastructure with Docker and the WordPress CMS.
- MINCIENCIAS group registration updates.

**Front-End Web Developer & Instructor**, Dominio Estudio de Diseño – Bogotá, Colombia Nov 2021 – Jan 2023

- Front-end development (web and mobile) and requirements gathering.
- Instructor at "Academia Héroes Tech" (Python and JavaScript) for the Mariano Matamoros D'Acosta Foundation.

**General Director**, GNU/Linux Group — Universidad Distrital – Bogotá, Colombia Jan 2021 – Aug 2022

- Direction of the GNU/Linux Group and promotion of free software.
- Teaching GNU/Linux operating-system fundamentals to the community.

## Education

---

**Universidad Distrital Francisco José de Caldas**, MSc in Information and Communication Sciences – Bogotá, Colombia Jan 2026 – June 2027

- Research-focused master's degree.

**Universidad Distrital Francisco José de Caldas**, BSc in Systems Engineering – Bogotá, Colombia Jan 2018 – Sept 2025

**Servicio Nacional de Aprendizaje (SENA)**, Tech in Software Development – Bogotá, Colombia Jan 2016 – Dec 2017

## Projects

---

**se-tesis — Audio Steganographic Cryptosystem** Jan 2025

Systems Engineering thesis (Python).

- Hides and encrypts information in audio using chaotic attractors, with text compression via neural networks.

**emotion-recognition-ICD** Jan 2024

Emotion recognition with deep learning (Python).

**ai-context-extractor** Jan 2026

Context extractor for Angular projects to feed AI models (TypeScript).

**grub2-theme-glud** Jan 2025

Custom GRUB2 theme for the Universidad Distrital GNU/Linux Group.

## Skills

---

**Backend:** Python / Django, Java / Spring Boot, Node.js, PHP / Laravel, REST APIs, Microservices

**Applied AI:** Anthropic Claude, Prompt Flow, Deep Learning, AI as a development workflow accelerator

**Cloud & DevOps:** AWS, IaC, Docker, GitLab CI/CD, Jenkins, Traefik

**Frontend:** Angular (16-18), AngularJS, RxJS, Angular Material, Vue.js, Bootstrap

**Systems & Security:** GNU/Linux, Oracle DB, Secure coding, Applied cryptography

## Certifications

---

- Engineering Practices for Building Quality Software
- Computer Security and Systems Management (Specialization)
- Claude 101 · Anthropic
- Effective Communication for Today's Leader
- Negotiation and Effective Communication Skills

## Languages

---

**Spanish:** Native

**English:** Professional Working
